

Vision Source recommends that ALL patients have a digital image of the retina done annually with the new scanning digital imaging system. Retinal problems such as macular degeneration, glaucoma, retinal holes/tears, choroidal melanomas, as well as conditions such as diabetes and hypertension can now be detected without dilation for most patients.

EARLY DETECTION IS CRUCIAL!

ADVANTAGES OF THE OPTOMAP RETINAL EXAM:

1. Retinal image becomes a permanent part of the patient's medical record.
2. A thorough view of the retina is seen quickly and easily **without** dilation.
3. NO blurred vision and no light sensitivity for the patient because dilation is usually unnecessary.
4. NO down time for the patient waiting to dilate. (Typically 30-40 mins)

Please initial below **ONLY** if you would like to have the Optomap done today.

If you initial below, you WILL BE CHARGED \$39.00 which will be collected at checkout!

This scan is not covered by insurance
